

CHALAPATHI INSTITUTE OF PHARMACEUTICAL SCIENCES

(Autonomous)

Name of the faculty: U. Mohan Chandu

Designation: Assistant Professor

Department: Pharmacy Practice

Teaching Methodology:

- To construct and develop the personality and mind-set of the student to work and learn either individually or in a group and to share the knowledge among them and to enhance their opportunity grabbing techniques without any dependency and preparing them for the real world situations and problems by quoting several live examples and asking them how they respond to that situations.
- By EEE (Experimentation, Evolution, and Experience) Technique, students analyze new theories and novel way of performing practicals and they learn from their errors and get good grip over how they are applying their knowledge.
- Starting with live examples and stories within the class or from society and drawing them to the concept either in theory or in practical's to create interest and to improve logical and reasoning skills. So, that the analyzing and reasoning capabilities of the student are enhanced.
- Conducting Crossword puzzles for the course anatomy and physiology to make the students remember the terminology easily.
- Using flipped classroom models and let students involve more in the class to boost their confidence by allowing them speak for a few minutes before the class and assessing them after the class, what they have learnt? After ending the topic.
