

Dr.KATTA SAI TEJASWI

Designation : Assistant Professor

Department : Pharmacy Practise

Research Areas of Interest : Pharmacoepidemiology and Pharmacoeconomics, Pharmacovigilance, Drug Related Problems, Patient Adherence, Quality of Patient LifeStyle for better Health.

Teaching Methodologies :

- Giving a brief description of the topic before starting the class
- Recollecting some points from the previous class and seeking attention about the strengths and weaknesses of the students. (Reward their strengths)
- Ward round participation and making the students gain knowledge at bedside regarding follow-up and diagnosis of different cases.
- Training students to know how to inject the medications like IM, IV, Subcutaneous and cannula insertion techniques.
- Initiating students to discuss Journal Club and Case Presentations weekly twice to know about different cases.
- Conducting Quiz and Group Discussions to Encourage and improve communication skills in Students.
- By using clinirex software students learn soft skills by entering data.
- Guiding students to clinical projects to publish the research articles in current research areas.
- Organizing public activities like Health and Medical Awareness Programme(HMAP); Home Medication Review (HMR) helps the students to build their communication skills.
