PROFILE

Name: Patchala.Abhinandana

Designation: Assistant Professor

Department: Pharmaceutical Analysis

Research Area Of Interest: Development of Analytical Methods by Different Analytical , Bio analytical techniques and impurity studies.

PAPERS PUBLISHED

Academic year	No of papers	Cited by

Teaching Methodologies:

1. Explaining the students about the subject by explaining them how drugs/medicine is playing a major role in once life.
2. Creating enthusiasm about how the pharmaceutical analysis is helping to test and maintain the quality of the products.
3. Showing them the relation between theory and real world by slides (ppts) and videos.
4. Making them understand about social responsibilities by conducting some group discussions and involving them in online courses like "MOOCS" t develop their skills.
5. Creating interest in learning the subject practically by relating the things to research and giving them lab activity in laboratories equipped with specific reagents and analytical instrumentation (UV- and FTIR spectrophotometers, HPLC apparatus, polarimeter, refractometer etc.), suitable for the drug quality control.
