

CHALAPATHI INSTITUTE OF PHARMACEUTICAL SCIENCES

(Autonomous)

Innovative Teaching methods

Name of faculty: Dr. M. Prudhvi

Designation: Assistant Professor

Department: Pharmacy Practice

Teaching methodologies:

1. Lecture method: Give a brief demonstration about the topics and detail discussion with traditional teaching method.
2. Discussion method: Before starting the lecture, make the students to discuss about the topic and recollect the known points about the topics.
3. Demonstration lesson: Demonstrate the particular topics with videos/PPT to make understand the topic; this can increase their motor co ordination skills.
4. Brainstorming: Discover new ideas and spontaneous responses of the topics.
5. To construct and develop the personality and mind-set of the student to work and learn either individually or in a group and to share the knowledge among them and to enhance their opportunity grabbing techniques without any dependency and preparing them for the real world situations and problems by quoting several live examples and asking them how they respond to that situations.
6. By EEE (Experimentation, Evolution, and Experience) Technique, students analyze new theories and novel way of performing practicals and they learn from their errors and get good grip over how they are applying their knowledge.
7. Starting with live examples and stories within the class or from society and drawing them to the concept either in theory or in practical's to create

interest and to improve logical and reasoning skills. So, that the analyzing and reasoning capabilities of the student are enhanced.
