"IKS INTEGRATION IN INDIAN PHARMACEUTICAL EDUCATION: FULFILLING NEP 2020'S VISION

Integrating Indian Pharmaceutical Education with the Indian Knowledge System (IKS) to meet NEP 2020's goals can revolutionize the field by creating a comprehensive and innovative educational framework. NEP 2020 highlights India's rich heritage of knowledge, encompassing Jnan (knowledge), Vignan (science), and Jeevan Darshan (philosophy of life). By embedding these elements, pharmaceutical education can merge traditional practices with modern advancements. For example, combining Ayurveda with contemporary pharmaceutical sciences can promote research on natural products and holistic health. Leveraging traditional knowledge in pharmacognosy can enhance drug discovery. Encouraging interdisciplinary research that blends modern and ancient sciences can lead to groundbreaking healthcare solutions. Additionally, incorporating the IKS can foster ethical practices, sustainability, and a deeper understanding of health and well-being. This integration can be achieved through updated curricula, collaborative research projects, and faculty training programs. By embracing this fusion, students will be better equipped to tackle future healthcare challenges while preserving and enhancing India's rich knowledge heritage.
